Have you been screened?

Mount Sinai Hospital, a leader in genetic testing, is offering free screening to test for seven genetic disorders that occur more frequently in people of Ashkenazi Jewish descent.

All Ashkenazi women and men, 18+ are encouraged to get tested to determine if you are a carrier of one of these genetic conditions.

Sunday, November 2, 2014
10 a.m. to 2 p.m.

Mount Sinai Hospital
600 University Avenue, Toronto
Ambulatory Blood Lab located
on the 4th floor (please use the escalator)

Jewish LGBTQ who are family planning are encouraged to get tested as well.

**Please bring a valid OHIP Card and the contact information of your primary health-care provider.*

For more information about the seven genetic disorders visit: www.whatsinyourgenes.com
