Issue:	New Inserts

To:	All Wayne Dalton Dealers
From:	Daniel Christian
RE:	New Inserts

Effective 3/17/2014, we are pleased to launch new and improved inserts. New inserts are designed with thinner mullions and less flange material around perimeter edges thus providing more light.

The new inserts feature about 33% less plastic coverage thus providing better lite transmittance and the larger lite appearance.

These new inserts are compatible for the Ranch Inserts for 9100, 9600, 8300, 8500 and 8000/8100/8200 Series Long Frame option (also used with Pan Sonoma):

- New Arch Stockton (available NOW)

- New Stockbridge II (available NOW)

In next 3-4 months we will be phasing out current 4 lite Stockton II, 10 Lite Cascade II and Waterton II with newer thinner mullions and less flange material design as shown below.

- 4 Lite Stockton II with the 8 Lite Stockton II (Coming soon, as we phase out old design)

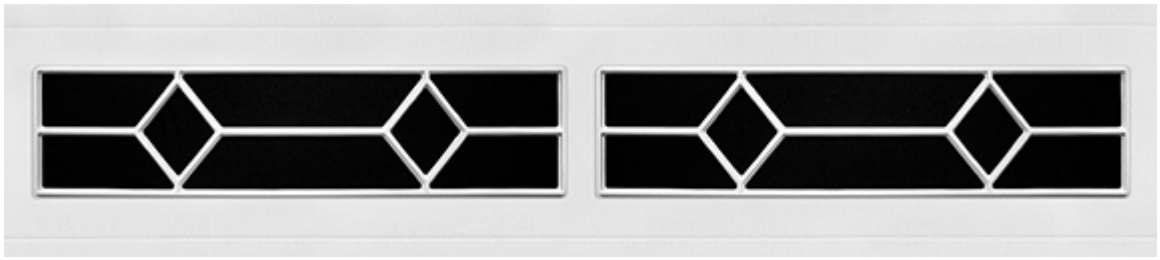
  New 8 Lite Stockton II

- 10 Lite Cascade II with the 8 Lite Cascade II (Coming soon, as we phase out old design)

  New 8 Lite Cascade II

- Older Waterton with the newer Waterton II (Coming soon, as we phase out old design)

  New Waterton II lite:



In Summary:

Insert Compatibility	Ranch Stamp	CRP Stamp	Sonoma Stamp	Availability
