

# Medicare's Algorithm for Prescribing Mobility Aids

*This algorithm outlines the order in which mobility aids should be prescribed. Once a patient receives coverage for a mobility aid, they no longer qualify for coverage on mobility aids that fall above it on this algorithm.*

**Cane/Walker**

**Manual Wheelchair**

**POV/Scooter**

**Power Wheelchair**

Following this algorithm encourages patients to maintain their independence and mobility. For more information contact Amigo Mobility International, Inc. at 1-800-MY-AMIGO.
