

Global Products

General-purpose sensors and accessories for industrial automation

Balluff North America

Florence, Kentucky USA

Balluff's Florence, Kentucky United States headquarters is located just south of Cincinnati, Ohio. Our customers are in industries such as automotive, machine tool, robotics, injection molding, packaging, material handling, and more.

In addition to sales, marketing, and logistic functions, this facility manufactures Micropulse® magnetostrictive linear position sensors and warehouses over 60,000 products.

The Balluff Global Network

Balluff spans the globe with representation in 49 countries.

Service

- 24 hour on-call service.
- Complete in-house technical support.
- Comprehensive product selection, cross reference, and application assistance.
- Fast, friendly experienced service – guaranteed!
- Same day shipping – in by 2:00 p.m. EST, out the same day!

⚠ WARNING

- Read, understand, and follow warnings and manual. Failure to do so could result in serious injury or death.
- NEVER USE AS A SENSING DEVICE FOR PERSONNEL PROTECTION
- Does NOT include self-checking redundancy circuitry required for use in personnel safety applications
- Does NOT meet OSHA and ANSI standards for point-of-operation devices

Balluff, Inc. - www.balluff.com - 1-800-543-8390

Performance and Value in Inductive Proximity Sensors

Balluff's economical line of inductive proximity sensors offers a broad range of top-quality, performance proven products. The family includes a wide array of tubular M8, M12, M18, and M30 sensors available in 3-wire DC and 2-wire DC models. Built to the same high standards as all Balluff inductive proximity sensors, these sensors are 100% tested to guarantee conformance to critical published specifications. This attention to quality and performance ensures all models provide years of worry-free, reliable operation which increases production run time and decreases maintenance costs.

Advances in integrated circuit technology and high volume production techniques enable Balluff to offer superior quality products at value pricing. These sensors also carry international approvals to meet the demands of a global customer base. All sensors are CE marked, cULus listed, and are backed by Balluff's standard lifetime warranty.

Product Family Improvements

- **3-wire DC PNP and NPN models provide more choice for control variations**
- **Metal porthole LED connector versions with robust connectors for rugged applications**
- **Extended range "shorty" 2-Wire DC normally-closed outputs for small spaces**

Features

- **Convenience – most models stocked for same day delivery**
- **Variety – 2 wire DC, 3 wire DC, flush/non-flush models, connectorized or cable out, M8 to M30 sizes**
- **Reliability – protected from short circuits, voltage surges, polarity reversal and current overload**
- **Quality – 100% tested, lifetime warranty**

Standard Specifications

Rated supply voltage	24 V DC
Supply voltage range	10...30 V DC, 12...30 V DC, or 10...36 V DC
Max. load current	100 mA, 130 mA, or 200 mA
Short circuit protection	Yes
Current overload protection	Yes
Voltage surge protection	Yes
Polarity reversal protection	Yes
Degree of protection	IP67 or IP68
Temperature range	-25° C...+70° C
Approvals	CE and cULus

Cable lengths may vary per model.
Consult factory for all available models.

Capacitive proximity sensors – object and level detection sensors that are competitively priced with above-average features

Balluff's economical line of capacitive sensors offers a broad range of products to reliably solve object and level detection applications. The family includes a wide array of tubular M12, M18 and M30 sensors available with either M12 connectors or pre-wired cables. Built to Balluff's high standards, all of the sensors offer reverse polarity and short circuit protection with enhanced EMC protection. Balluff's attention to quality, superior sensor design, and performance means better reliability, less down time, and higher productivity.

Features

- **Stainless steel or plastic (PBT) housings**
- **PNP and NPN versions with normally open or normally closed outputs**
- **Large Green power on LED**
- **Large Yellow output function LED**
- **High EMC noise immunity**

Standard Specifications

Rated supply voltage	24 V DC
Supply voltage range	10...30 V DC,
Max. load current	100 mA,
Short circuit protection	Yes
Polarity reversal protection	Yes
Switching frequency	100 Hz
Power indicator	Green LED
Output function indicator	Yellow LED
Degree of protection	IP67
Temperature range	-25° C...+70° C
Approvals	CE and CULus
Cable length and material	2m PUR

Object Detection

- **Flush switching characteristics**
- **Extended switching distances**
- **Recognition of plastic parts**

Flush-mount capacitive sensors employ a concentrated electrical field to detect objects up to 15mm away, regardless of color, texture or material.

Level Detection

- **Improved adhesion compensation through non-flush switching characteristic**
- **User adjustable sensitivity**

Non-flush mount versions of the sensor line are ideal for level detection of bulk material or liquids either directly or through a plastic or glass container wall. Non-flush sensors make use of a spherical electrical field that compensates for material adhesion with sensing distances up to 25mm.

The best choice for everyday sensing needs

Simple to use, easy to install, economically priced – these characteristics describe this line of photoelectric sensors from Balluff. Featuring complete families of background suppression, diffuse, retroreflective, and thru-beam technologies, and several body styles to choose from, there is a solution waiting for your application. For standard specifications, refer to page 34.

Background Suppression – page 19

An advanced sensing technology, Background Suppression sensors are able to sense targets and ignore objects behind them. This is made possible through either a mechanical or electronic adjustment on the receiving element that looks for the light reflected off of the target. These single-piece sensors feature an adjustable or fixed sensing range that lets you sense your target at a specific point within the sensor's range.

Diffuse – page 20

This standard sensing mode relies on the target to reflect light back to the receiver to turn on its output. Featuring a single piece design, these sensors are less expensive than Background Suppression sensors since they do not have the advanced technology necessary to ignore objects behind the desired target. Diffuse sensors also have an adjustment potentiometer or teach pushbutton that allows you to set the desired sensing range of the target.

Retroreflective – page 24

In Retroreflective sensing, a self-contained sensor with both an emitter and receiver emits light towards a reflector mounted within its rated sensing range. The output of the sensor is actuated when a target is passed into the effective beam of the sensor and it blocks the return of light to the receiver. The primary advantage of Retroreflective sensors over Diffuse or Background Suppression sensors is longer sensing range.

Thru-beam – page 26

The most reliable form of photoelectric sensing, Thru-beam sensors include a separate emitter and receiver that are aligned such that the maximum amount of light from the emitter hits the receiver. The output of the receiver is actuated when a target passes between the sensors and blocks the light to the receiver. Thru-beam sensors also feature the longest sensing range of these modes since all of the light from the emitter is directed at the receiver.

Polarized Retroreflective Sensors

In the illustration, light emitted by the sensor is filtered to take the vertical component out of the waveform. The light is then reflected off of a corner-cube reflector, which changes its orientation by 90 degrees. An additional filter is placed on the receiver lens to stop any light with the wrong orientation from getting through to the receiver, including ambient light or light reflecting from a shiny surface (like a mirror). This method of filtering allows Polarized Retroreflective sensors to see all kinds of targets.

Balluff Global – Magnetic Field

204/214 C-slot, 235 T-slot

Sensors for pneumatic cylinders

Balluff's magnetic field cylinder sensors are based on non-contact, solid-state sensor technology that is compatible with both reed and Hall Effect magnetic pole orientations, making them the ideal replacement for standard magnetic switches. Electrically rugged, they feature short circuit protection, overload protection, and reverse polarity protection...all backed by Balluff's exclusive Lifetime Warranty. Improved sensor performance and better reliability results in less downtime and increased productivity. With Balluff's magnetic field sensors, you install and forget them.

Balluff's compact BMF sensors are designed to fit either C-slot or T-slot extrusions and require no additional brackets for mounting. These sensors fit flush into the slot, offering better sensor protection...nothing sticking out and nothing in the way. Flush mounting sensors make installation in space critical applications easier and less time consuming. In addition, cable clips are included for cleaner cable routing and better strain relief.

BMF Standard Specifications

Rated supply voltage	24 V DC
Supply voltage range	10...30 V DC,
Max. load current	100 mA,
Short circuit protection	Yes
Polarity reversal protection	Yes
Function indicator	Yes
Output function indicator	Yellow LED
Degree of protection	IP67
Temperature range	-25° C...+85° C
Approvals	CE and cULus
Cable material	PUR
Rated switching field	15 gauss
Assured switching field	25 gauss

BMF 204 and BMF 214 C-slot – Single Sensor

These magnetic field sensors are C-slot styles that are bracketless and provide rock-solid holding

Position detection with compact sensors for C-slots

BMF 204 – Designed for 3.8 mm slot

BMF 214 – Designed for 4 mm slot

- Slides into the C-slot from the end
- Superior holding strength
- Miniature design for short stroke cylinders and grippers
- Precise, accurate positioning

Series	BMF 204				BMF 214			
Cable length	.3 m	.3 m	.5 m	2 m	.3 m	.5 m	2 m	5 m

3.8 mm (BMF 204) 4 mm (BMF 214)

BMF 235 T-slot – Single Sensor

Position detection with compact sensors for T-slots

BMF 235 – The new standard for every T-slot

- Large, ultra-bright LED for easy diagnostics
- Installs from above into the T-slot – drop-in installation
- Installs with standard screwdriver or 1.5 mm Allen wrench
- Short, compact design with greater holding strength

Series	BMF 235

BMF - V-Twin

204/214 C-slot, 235 T-slot

V-Twin M8

V-Twin M12

Balluff's V-Twin® magnetic field sensors provide two sensors with a single connector in either an M8 or M12 configuration.

Substantial savings when using two sensors on one cylinder

- One, four-conductor cable versus two, three-conductor cables
- Less installation hardware
- Fewer wiring terminations
- Less installation time
- Lower initial costs compared to two separate sensors
- Double the number of sensors into a multiple interface block or sensor hub

Know your cylinder? Find your sensor.

Balluff's exclusive, easy-to-use online Pneumatic Cylinder Sensor Resource Center is designed to help you select the best solution for specific cylinder models.

The web-based interface will generate up to three sensor recommendations for each application. The Resource Center is designed to help you make a preliminary selection of products so you can download sensor datasheets and mounting bracket installation instructions.

The Resource Center will reduce your design time, aid you in component standardization, and ultimately provide you with a reference guide that will help reduce downtime when a replacement sensor is needed.

Pneumatic Cylinder Sensor Resource Center

Know your cylinder? Find your sensor.
Balluff's online Pneumatic Cylinder Sensor Resource Center is designed to help you select the best solution for specific cylinder models and will generate up to three recommendations. This selector is designed to help you make a preliminary selection of products. This tool will reduce your design time, aid you in product standardization, and ultimately provide you with a reference guide that will help reduce downtime.

Balluff Magnetic Field (BMF) sensors are based on robust, solid-state magneto-resistive technology. Available in metal or plastic housings, they have short circuit / overload / reverse polarity protection and come with an industry-leading LIFETIME warranty. Options include weld field immunity, application-specific brackets, and a variety of connection means including Balluff's exclusive V-Twin™ dual-sensor split connector system. The V-Twin will cut your hook up time and reduce your material costs by eliminating extra cordsets and Y-splitters when connecting to field I/O blocks.

Let us convince you that Balluff can be your #1 cylinder sensor supplier!

DC – Power Supplies

For industrial automation power supply applications, the quality you expect from Balluff at a competitive price.

- 24 VDC output
- 0.75A to 40A output
- Single and three phase input
- DIN rail mount
- CE, UL, CUL, and TUV approvals
- Short circuit protected

Photoelectric accessories

Type	Reflector Ø 84 mm	Reflector 51×62 mm	Small L bracket	Protective bracket
Mounting	One M5 screw	Two M4 screws	Two M3 screws	Two M3 screws
Ordering code	BAM00RH	BAM00WL	BAM00U5	BAM00U6
Material	PMMA	PMMA	Stainless steel	Stainless steel
Suitable product	All	All	BOS 5K	BOS 5K
Temperature range	0...+65 °C	0...+50 °C		
Reflectivity rating	85%	100 %		

Type	Small L bracket	Mounting adapter	Small L bracket
Mounting	Two M3 screws	Two M3 screws	Two M3 screws
Material	Stainless steel	Durethan	Aluminum
Suitable product	BOS 11K	BOS 18KF/KW	BOS 18KF/KW
Ordering code	BAM00PT	BAM00RW	BAM00RY

Capacitive accessories

Mounting Brackets

Fits	M12	M18	M30
Dimensions (mm)			
A	10.5	11.7	19.1
B	29.5	38.1	67.8
C	38.1	45.0	69.9
D	12.1	18.1	30.1
Tube diameter (mm)	9.4-20.6	9.4-20.6	25.4-44.5
Ordering code	BAM015E	BAM015F	BAM015H

Material: Plastic and Stainless Steel

Accessories Deliver Faster Changeover Time

A common application, tank level control, is now simple with Balluff BCSA sight glass mounts. On and off levels can be easily adjusted on the external tube by moving the sensors up or down as desired. The ability to make these process changes quickly saves you money and satisfies the need for high-accuracy feedback.

Cover Nut

Fits	M18x1	M30x1.5
Ordering code	BAM00F1	BAM00H2

Note: All units are in mm

Protective Teflon™ switchwells are perfect for attaching capacitive sensors to containers for level detection.

Please note. The nominal switching distance of capacitive switches is reduced by 2 mm when the cover nut is installed.

BMF accessories

Tie rod and round body cylinders – T-slot sensors with “stay put brackets” offer solutions for tie rod and round body cylinders.

BMF 235 – round body

T-slot bracket with tube cuff

Part number	Cylinder diameter (mm)
SET010H	7-11
SET010J	11-19
SET010K	18-29
SET010L	28-39
SET010M	38-49
SET010N	48-59
SET010P	58-69
SET010T	68-79
SET010R	78-89

Tie rod brackets for BMF 235

Part number	Cylinder profile
BAM01M9	Profile cylinder and tie bar up to 5...11 mm
BAM01MA	Profile cylinder and tie bar up to 9...15 mm
BAM01MC	Profile cylinder and tie bar 14...20 mm

Sensor Technology Guide

	Description	Sensing Range (typ.)	Advantages	Disadvantages	Applications
Inductive 	Detects various metal targets using magnetic field	0 - 30 mm	Popular, very rugged, best in harsh environments, economical, simple use	Short range, detects only metal targets	General purpose, welding, metal cutting, RPM pickup
Photoelectric: Diffuse 	Detects any target capable of reflecting light	0 - 900 mm	Popular, good for small targets, handles many applications	Short range, affected by dirt, color dependent	General purpose, color mark, label detection
Photoelectric: Retroreflective 	Detects any target capable of blocking light	0 - 16 m	Best for conveyors or transparent targets, medium sensing range	Requires a reflector, affected by dirt build-up	Conveyors, large openings, bottle detection
Photoelectric: Thru-Beam 	Detects target capable of blocking light	0 - 60 m	Best for long range or to look through a translucent object, tolerant of dirt	Requires both an emitter and a receiver	Height verification, loop control, fill level
Capacitive: Object Detection 	Detects target based on change in density	0 - 25 mm	Best for detecting dense materials; adjustable, simple	Short range, affected by humidity changes	Detects objects regardless of color, texture, or material
Capacitive: Level Detection 	Detects target based on change in density	0 - 25 mm	Best for detecting bulk material or liquids directly or through plastic or glass container wall	Can be affected by material buildup	Detects objects regardless of color, texture, or material
Magnetic 	Detects a magnet	Magnet dependent	Best for pneumatic cylinders, detects through most objects (except steel)	Short range, requires magnet	Cylinder position detection

Global Fork and Angle Sensors Self-contained through-beam sensors

Balluff's newest additions to the Global products are self-contained through-beam sensors that are designed to solve applications that many other sensors cannot. Offering reliable performance in an innovative package, these sensors are the first ones to use in error-proofing, process monitoring, and general automation tasks in a number of environments.

Fork light sensors

C / U slot or fork sensors are universal self-contained through-beam sensors available in slot widths from 5 mm up to 220 mm. The self-contained design means the emitter and receiver are always in alignment.

Angle sensors

Angle self-contained through-beam photoelectric sensors are the best for large or varying size objects, two axis movements, and confined space applications. Leg lengths vary from 40 mm x 40 mm to 110 x 110 mm.

Features / Benefits

- Rugged metal one-piece housing - always in alignment
- Easy installation
- Visible red light - easy setup
- Glass optics
- High resolution
- Stackable
- Light / Dark operation selectable
- Adjustable sensitivity
- High switching frequency
- M8 connector with 360° LED

Applications

- Part sensing on conveyor and feed belts
- Parts counting
- Tool break monitoring
- Part dimension verification
- Position verification
- Level monitoring
- Error proofing
- Part accumulation
- Part detection in grippers
- Handling and assembly

See reverse side for descriptions and ordering information

Fork Sensors

BWL0006	BWL 110110D-R012-S49	110x110mm, NPN, Red Light, 0.6mm resolution, M8 connector

Object Detection

Inductive sensors, cylinder sensors, magnetic field sensors, capacitive sensors, ultrasonic sensors, photoelectric sensors, fiber optic devices, fiber optics, angle sensors, through-beam fork sensors, optical window sensors, light grids, contrast sensors, luminescence sensors, color sensors, mechanical and inductive single and multiple position switches

Linear Position and Measurement

Micropulse® transducers, magnetic linear encoder system, inductive displacement system, inductive distance sensors, magnetoinductive distance sensors, capacitive distance sensors, photoelectric distance sensors, ultrasonic sensors

Fluid Detection

Pressure sensors, capacitive sensors for level detection

Industrial Identification

Industrial RFID systems, vision sensors

Networking and Connectivity

Connectors and connection cables, valve connectors, passive splitter boxes, active splitter boxes, IO-Link, bus systems (Profibus, Profinet, CC-Link, DeviceNet, EtherNet), inductive couplers, power supplies, electrical devices

Accessories

Brackets and mountings, assembly system BMS
