

## **TenPoint Crossbow Service Checklist**

### **Front End Service:**

- 1) **Examine the limbs for cracks, scratches, and gouges.**
- 2) **Inspect the wheels/cams for flat spots or markings that could threaten the integrity of the string.**
- 3) **Remove axles to determine if they are bent.**
- 4) **Examine string and cables for any loose or cut strands. Ensure servings are tight and in good repair. Check wheel rotation to determine amount of string stretch.**

### **ACUdraw/ACUdraw 50:**

- 5) **Examine claw tops for cracks, the claw for gouge marks or deep scratches that might compromise the finish on the barrel. Ensure that the felt pad is in good repair or the teflon pad is installed.**
- 6) **Inspect the draw cord for any excessive wear or damage.**
- 7) **Examine the retraction spring for kinks or flat spots.**
- 8) **Cycle the claw in and out several times to test for smooth operation and adequate spring tension.**

### **Stock/ Trigger:**

- 9) **Inspect flight rail on stock for any imperfections that may cause center serving wear. Examine for loose or missing parts.**
- 10) **Cycle trigger several times by hand to ensure all parts are functioning smoothly and are properly lubricated.**
