

International Missions

Dominican Republic & Puerto Rico Mission Trips:

We will continue to send our two teams geared towards physically constructing new buildings and building new relationships through evangelism as we transform lives spiritually with the love of Jesus Christ. If you have never participated in an International mission trip, we ask you prayerfully consider going as it will transform you as you reach out serve others.

Missionaries:

Craig and Joanna McClure: Missionaries to the Dominican Republic

They run a medical clinic in a local village and recently added the ability to provide water cheaply to many more people in the region. Our missions team to the DR has expanded their facilities to include a pastor's training and study in addition to the school they already run. This allows the pastors they have relationship with to meet, learn, and go out and plant new churches. Craig and Joanna expect the birth of their latest child anytime!

Matt and Giuliana Reuschle: Missionaries to Peru

Through their soccer academies and partnering through local churches to educate, feed, and evangelize the local populations, they connect to Peruvians by providing coaching courses, camps, academies, meal programs, tours, leagues, and more. Purpose is "To communicate the good news of Jesus Christ to the people groups in Peru through soccer."

Carey Childrey

Through Paraclete Mission Group, Carey works directly with Missionaries in India and Ukraine, providing them with seminary level educational training through their academy. Just as important, Paraclete provides counseling, spiritual direction, mentoring, and coaching to these missionaries who turn around and serve the communities they are from.

Carey recently recounted the story of a seventeen year old girl from their academy who was reading her Bible when her brother came home and beat her for it. He took the Bible and threw it into the fire, threatening her with death if he ever caught her reading it again. She came back to the academy the next day in tears over the loss of the Bible and asked if she could have another. The academy thought it best for her to wait until she was eighteen, as then she would be safer, but she implored them to give her one right then. She cried again at the replacement Bible and they encouraged her to simply hide it on her and only read it in the safety of the restroom when she was alone. Just the having the Word of God in her possession brought her great joy and peace as she faces that persecution each day of her life.

Abraham and Kamala Khan

Missionaries in Nepal, one of the least reached places on earth for Jesus Christ. Over the last difficult year they have suffered through political opposition from the new ruling party there and the devastating floods cause by the monsoons that destroyed several churches they had built and many of their congregants' homes.
