Call for Presentations

The *Sustaining the Blue Planet* conference team requests proposals for presentations from educators, policymakers, businesses, municipalities, program designers, implementers and practitioners and all others interested in water education.

The goal of the conference is *to increase the knowledge and capacity of conference participants to effectively reach children and youth through education that leads to action in schools, communities and corporations.* In the interest of innovation, engaging and interactive presentations are encouraged. Presentations must address one of the following strands:

Innovations in Water Education

How is water education being used in new and more effective ways in schools and communities?

Successful Approaches to WASH Education

How are effective program models and innovative partnerships in WASH education resulting in behavior changes and local solutions?

Technology & Water Education

What are ways that technology can be used to expand the scope and reach of water education and to assist in solving water issues?

Encouraging Water Education in Corporate Sustainability

How are corporations using employee education and training to promote personal sustainability practices and business goals while helping employees effectively and credibly tell their company's water and sustainability story through strategic interaction with schools, communities and other key local, national and global stakeholders? How can corporate giving support educational programs that lead to meaningful results and actions?

Education Solutions for Priority Water Topics

What are the most successful methods for addressing the most important water challenges of the day, including:

- Watersheds.
- Risk (drought and floods).
- Ground water.
- Storm water.
- Pharmaceuticals and personal care products in water.
- Weather and climate change.
- Water and energy.
- Water conservation.
