## Product Offering

The Twilight™ Golf Lighting products fall into two distinct categories – cup lighting TWGC and perimeter lighting TWGP. While each can be used independently of the other, the best effect and experience is only fully realized when the two are used together.

### Cup Lighting TWGC

### Perimeter Lighting TWGP

# Twilight Golf Lighting Products

## Benefits

A simple way to increase club revenue by promoting special evening events, extending Putting Green play and attracting new members (not just golfers, but the whole family).

Highlighting the beauty of the venue will attract special events like wedding receptions, anniversaries, graduations, birthdays and holiday celebrations; these unique lighting options will set them apart from their competition.

Lighting up the putting green allows members, guests and customers to remain longer and potentially enjoy the other attractions the facility has to offer like dining, lounges and the Pro Shop.

## Cup Lighting

## Perimeter Lighting

**The leader in golf.**

# Twilight Golf Lighting Products

## Benefits

Potential new members are comparing the experience at various venues being considered. Lighting will have a dramatic impact on their first impression and will have a positive impact on their decision.

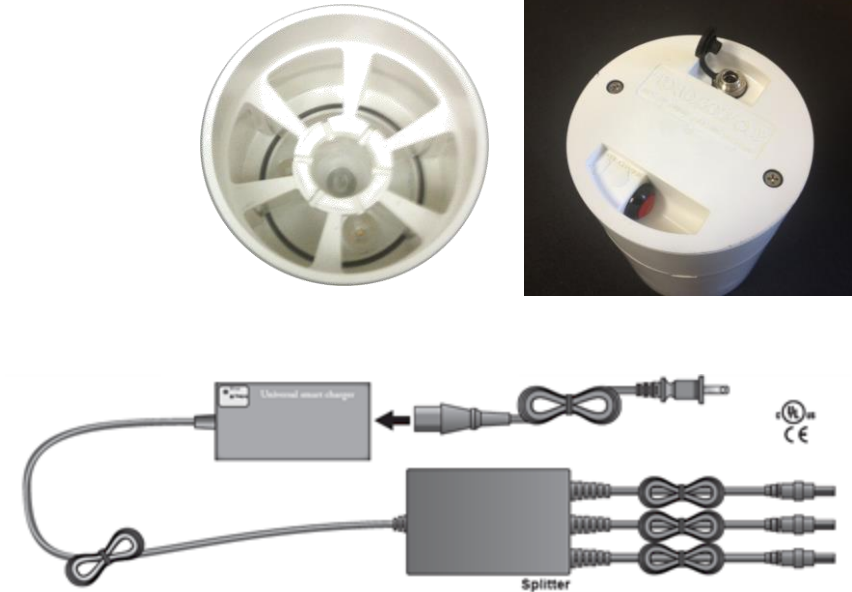

**A limited number of the display pictured here will soon be available to help you with promotion at your facility**

# Twilight Golf Lighting Products

## TWGC Cup Lights

- White ABS cup aligns notches in solid brass ball catch with notches in cup. Fits most standard and putting green flags.
- The bottom compartment houses the on/off switch charging port and Lithium-Ion battery.
- Charger will charge up to three cups at once. Average time to charge is five hours.

# Twilight Golf Lighting Products

## TWGC Cup Lights - Individuals

TWGC cup lights provide a focused light beam upward to highlight the flag and cup placements on the green.

- The cup light is sized to easily install into any standard cup hole.
- Battery-operated and wireless, with high illumination, energy-efficient LED lamps and proprietary optical lens, they make the flag and cup placements pop off the green!
- Their lithium ion battery will provide illumination for a full 8 hours and requires approximately 5 hours charge time to achieve full capacity.
- The cup lights can be located anywhere you can punch a hole!

## TWGP Perimeter Post Lights

TWGP perimeter post lights broadcast a wide illumination to light up the entire green to near daylight conditions.

- The perimeter post lights plug in for use when desired for evening activities and are removed when not in use during the day.
- Permanently-installed receptacles are flush-mounted to grade off the putting surface.
- Just lift the lid and plug in the TWGP to light up the green.
- The high-illumination, energy-efficient LED and vertical-spread lens broadcast light to maximize coverage and minimize scallops between the lamps.
- Post lights are spaced at 12 to 15 foot intervals for best performance.

# Twilight Golf Lighting Products

## TWGP Perimeter Post Lights

KEY FEATURE! Quick-connect base allows the lights to plug in for use when desired for evening activities and are removed when not in use.

Permanently installed receptacles are flush mounted to grade just off the putting surface.

# Twilight Golf Lighting Products

## TWGP Perimeter Post Stake

Installation stake for perimeter area lighting to illuminate the putting green.

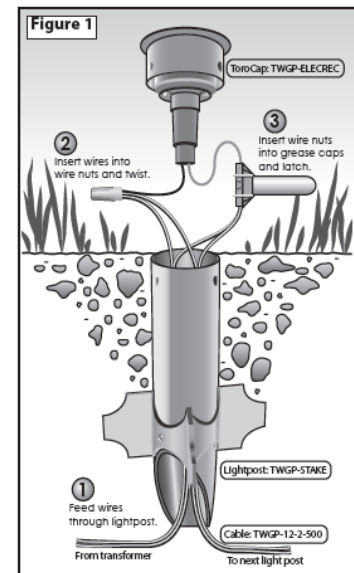

Just lift the lid and plug in the TWGP to light up the green. Lid is flush to grade when not in use.

The TWGP-STAKE will be wired directly to a low-voltage transformer system.

## TWGP Perimeter Post Light - Individuals

TWGP perimeter post lights broadcast a wide illumination to light up the entire green to near daylight conditions. LED lamp should last for 15 years at 8 hours/day usage.

- Perimeter area lighting to illuminate the putting green.
- Directional luminaire is crafted from solid brass, has an adjustable head for on-site adjustability and comes with a glare reducing hex cell louver.
- Luminaires utilize state-of-the-art 5 Watt FLEX™ Series LED lamps at 3000K color temperature for quality lighting
- 36" tall solid brass construction luminaire

# Twilight Golf Lighting Products

## Installation Overview

- Lay out lights around perimeter at 12 to 15 foot intervals.
- Put no more than 5 lights per wire run.
- Use only 12 gauge, 2conductor UF type wire for each wire run
- Bring all wire runs into Fuse Hub
- Each Fuse Hub can handle 4 wire runs
- Run a single cable to the transformer
- Splice together using included splice kits
- Connect transformer to building power with a GFI circuit.
- NOTE: All wires and connections must adhere to local and federal codes.
