FURNITURE

- Exceptional Thomasville dining room suite, originally from McArthur's Fine Furniture. The set is made from rich Ash burls from the forests of France and Germany. These woods display all their usual characteristics, being swirls, waves, "eyes," occasional dark streaks, and varied grain direction. These intricate grain patterns are formed as gnarled wood grows in to replace tree limbs cut for firewood. Burls have the tendency to develop small cracks and surface imperfections upon aging, which is your guarantee that you have "genuine burl." The hardware is lacquered brass and is the finest in the world. Doors on the display towers are paneled in beveled-edge glass.
- Buffet with towers on either end, 6 tempered glass shelves, tempered glass interiors and mirrored back, as well as lighting features. The center bridge between the towers houses a 44" w. x 47" h. mirror. Directly below the towers are large double cupboard doors with interior shelves. The lower part of the bridge area has 2 cutlery drawers and 2 lower shelved cupboards.
- Table can be 72" long and seat 6 very comfortable, or, add 2 (36") leaves to seat an additional 4 people. There is a set of velvet-backed protector pads that are included when you buy the table.
- Chairs include 6 high-backed, armless chairs and 2 captains chairs, with very well padded, upholstered seats. Note the pierced back splat, resembling stylized 3-leaf clovers, end on end. Chairs seats are well-padded and measure 18" deep and 21" wide and 21/2 " thick.
- This set is approximately 20 years old but looks great and, with care, will last for generations.

- Cherry wood and tempered glass dining room set. Made by Collingwood and purchased originally at Kai Mortensen. Con-

sists of:

- 2-piece buffet hutch in glorious cherry wood burl veneers. Cupboard on either end of top, with central light up display area, with 2 tempered glass interior display shelves, and mirrored back and sides. The display area continues to the base, replicating the top with mirrored back and sides, and 2 tempered glass display shelves as well as lighting. On lower level, 4 glass shelves blanket either side of the glass and mirrored display area. *It's been suggested that this one piece could easily be split up to make two.
- Table has a matching wooden "drawbridge" base with a pedestal at either end, and rainbow-like curved glass decoration immediately below the glass. Tabletop is a 5/8" solid piece of clear, tempered glass, with a triple-molded edge with rounded corners (the cost of the glass alone is prohibitive today). The chairs are extremely comfortable, with a rounded top rail. The rounded high backs are 25" high with center splat and seats measuring 22" wide, 19" deep, and 2" thick, making them very comfortable, whether you're tall or short. This set will easily last several more generations.
