Additional Information:

Based in Southern CA, EnviroTech Lighting is a full-line Energy Efficient Lighting company specializing in Light Emitting Diode (LED), Fluorescent and Induction Lighting as well as Occupancy Controls. EnviroTech manufactures and supplies UL/ETL as well as Energy Star and Design Lights Consortium (DLC) Listed Fixtures and Retrofit Kits designed for Commercial and Industrial customers who are interested in taking advantage of available Utility Rebates for upgrading to Energy Saving solutions.

EnviroTech products range from LED Replacement Lamps to Warehouse and Exterior Parking Lot/Garage Lighting applications and take advantage of innovative technology including bi-level controls and customized retrofit solutions. Our end-user customers include Building Owner/Property Managers, ESCO's, Government Municipalities, Manufacturing, Retail and Hospitality clients. Through our specialized approach and how we design and source our products, we can offer the most cost competitive products and pricing in the market and innovative ways to help customers "value engineer" their lighting solutions. EnviroTech Lighting offers a complete lighting solution and excellent commission opportunities for Manufacturer's Reps.

This bulletin is offered as a service of NEMRA to keep members informed of lines available. The listing of a manufacturer should in no way be construed as an endorsement of that line by NEMRA, it being the obligation of each representative to make his/her own evaluation of the line.
