BLACK AND WHITE™

Perfectly paired and beautifully balanced. Simple, stylish, powerful and pure. Black and White.

ZEBRA

Black stripes on white or white stripes on black? Either way this life-size zebra print is a dynamite look. The bold wallcovering is uber sophisticated in a post-modern setting, super trendy for a fashionable teen, or wild and wooly in a little boy's safari themed bedroom. The yin and yang of the contrasting colors is a great backdrop for bright furnishings.

NOVELTY EURO SCENIC

Jules Verne would have loved this wallcovering. Viewing this cosmopolitan print is a trip around the world in far less than eighty days! The design includes the Eiffel Tower, the London Eye, Venetian gondolas, and many more landmarks from across the pond. World traveler or armchair vagabond, this cleverly sketched design, in black, red and grey, on white, will be a delightful addition to your home décor. Incorporate red accents.

MEDALLION WITH SCROLL

Fresh and contemporary, this lively wallcovering features six inch daisy shaped metallic medallions liberally scattered over contrasting curlicues. The pert tri-colored raised pattern makes a unique decorating statement wherever you choose to install it. Three color variations are available including black with Katydid green on a white field.

BIRDCAGE

It's only a bird in a gilded cage, but how it makes you smile. The whimsical feathered friends sit and flit across this cunning wallcovering. Glimmers of metallic ink add shiny highlights to the silver on black or black on white color combinations. It is a lovely and cheery selection for a breakfast nook, sun room or powder room.

NEWSPRINT ACCESSORY

What's black and white and "read" all over? Here's the answer to that child hood riddle! This wallcovering, depicting vintage European retail advertisements, is black and white and entertaining to read. That's a little bonus to the handsome and intriguing look it will bring to your home office, library, or powder room. The colors are creamy white with black and grey print.

HARRIS PLAID

The look of this wallcovering is analogous to fine fabric, a handsome Harris Plaid. This geometric pattern bears a semblance to the menswear woven wool. Presented in dignified shades of tan and grey on cream or black and brown on white, this paper is particularly appealing in a gentleman's space; perhaps a library or office.

CHEVRON

Make a strong statement with this wallcovering. The oversize chevron pattern zigs and zags making a retro impression not to be denied. This design will embolden the décor of a modern home. For greatest impression select shades of black and grey with the shine of Mylar; for a softer version choose beiges and creams or stark black and white.

SILK STRIPE

All dressed up with someplace to go; on your walls! This alternating contrasting stripe is embellished with a miniature chevron pattern, some in a metal finish to bring a shine to the design. This wallcovering would look good most anywhere but especially in a more formal setting. Choose from grey and white or black and white, both with silver metallic.

OLD WORLD TOILE

A romantic French fantasy evocative of Marie Antoinette, this lovely toile is a delightful depiction of halcyon days. Borrowed from a document fabric, the pattern of this wallcovering includes merry maids and gentlemen as well as a myriad of flora and fauna. The dual color design is presented in black and white or black and ecru.

GEOMETRIC LATTICE

A glittering geometric lattice forms a gleaming pattern on a matte field and makes a striking wallcovering where boldness is desired. The large scale design might have been borrowed from an exotic Moroccan door. There is an air of romance and secrecy about it. Select from black with raised gold or white with textured silver.

NEOCLASSIC URN TOILE

A departure from the pastoral theme, this take on toile has a more sophisticated edge. The neoclassical wallcovering features a pattern replete with hanging urns overflowing with flowers, chubby cherubs, soaring birds, and scrolling branches adorned with beads and ribbons on a field of diamond shapes. This out-of-the-ordinary paper is black and white on pale butter yellow, an extraordinarily pleasing color combination.

WATERCOLOR FLORAL

There's purity about this wallcovering. The design, so lovely in its simple rendering, speaks of tranquility and repose. The artistry is presented in charcoal on pearlescent white or charcoal on pearly beige. While this serene print is ideal for a bed and bath it could be used virtually anywhere you want to set a calm and peaceful ambiance.

OPEN TRELLIS

A clever pattern of intersecting lines creates an open trellis motif on this wallcovering. The circles and quatrefoil shapes on an open field are similar to ironwork on a New Orleans garden gate. The pattern is enforced through the use of contrasting colors of black on white or chalk on lead grey.

DOTTY STRIPE

If you have champagne taste, you'll love this wallcovering. The sinuous trail of multi-sized dots rises upward like the bubbles in a crystal flute. It is light hearted and festive in an amusing fashion; so clever in a bath or wet bar area. The effervescent color combos are black or silver on white.

TRES CHIC

Leafy branches are reaching for the sky on this stunning wallcovering. In dramatic fashion, the large scale tricolor design stands out against the pure white background making a profound visual statement. The branches are slick shiny silver with contrasting black and tan foliage.

LEAF OUTLINE SIDEWALL

A leafy bower of tangled vines reflects an artist's impression of nature's handiwork. The graphic depiction is elegant in its stylish portrayal that evokes both Art Nouveau and Art Deco influence. It is available in a muted pearlescent gold or carbon black, each on a pure white field.

TREE SILHOUETTE SIDEWALL

Who doesn't love a tree house? Out of sight in a leaf shaded hideaway up above the earth; it's a romantic notion we never outgrow. This wallpaper, with its branching tree design, elevates your room to that fantasy status. Your choice of black or tan on a creamy white background.

TWILL SISAL

This wallcovering has an organic appearance with fibers woven into a natural grasscloth. The texture adds interest and additional dimension to the room and would make a powerful focal wall aligned with a lighter color or patterned paper. This version is done in a rich dark chocolate color that is quite dramatic.

DECORATIVE DAMASK

With a respectful nod to the past, this modern interpretation of damask makes an indelible impression! The wallcovering flaunts a pattern consisting of oversized stylized foliage medallions and scrollwork framing on a mottled field. Select from bold black on off white, cream on pearlescence, or silver sheen on ecru.

GRAPHIC DAMASK

Colossal in size, contrasting floral medallions appear in a diamond configuration on a solid background. This statement making wallcovering, influenced by traditional damask design, has the bombastic look of bold modern décor. Your choices include a neutral cream on beige, brash black on snow white, or shiny black onyx on matte midnight black.

DOCUMENT DAMASK

A damask design as delicate as a Spanish mantilla, the detail as intricate as a lacy bridal veil, this wallcovering is a stunner! Ladylike, refined, dainty in scale, the pattern is so appropriate for a lady's bedroom and bath. The shiny woven ground is available in golden pearl, silver sheen, or a mottled graphite grey.

OGEE DAMASK

Large and lively and lovely, too; this tri-color damask demands to be seen. The wallcovering, with its powerful graphic concept of the traditional design, will be at home in your modern house. Your color choices of the silhouetted pattern are black and gold or black and silver on white.

NEOCLASSIC DAMASK

The Greco-Roman influence is evident on this Neo classic wallcovering. The metallic crackled background suggests antiquity. The harmonious pattern of graceful wheat sheaves and scrolling acanthus leaves are embellished with beads and concentric circles of foliage. The symbiotic elements create a pretty picture and are available in two pleasing neutral color choices, both featuring greys, off whites, and tans.

CHANDELIER DAMASK

A bit of glitz and a touch of glamour; this wallcovering showcases a collection of whimsical chandeliers framed in sinuous scrollwork and dusted with glitter or touched with metal. The contemporary take on traditional damask design is a little cheeky, a lot of fun. Available in black, white and silver, how dramatic yet charming in a lady's bath or dressing room with mercury glass accessories.
