check to the workshop. NOTE:  
\*\*\*The Phoenix Chapter does  
not accept credit card  
payments due to the high  
costs of processing time and  
fees.\*\*\*

#### **Beyond Basic First Aid: Introduction to Tactical Combat Casualty Care (TCCC), a Primer for Environmental Contractors**

**Presenter:** Mike Simpson of ARES Security Corporation

Accidents happen on construction projects. Most restoration, remediation and reconstruction companies equip their truck or site with a basic first aid kit. This is great if you get a splinter or scrape your knee. But you know more substantial injuries are a real potential: fall from height, a deep cut from a power tool, a penetration to the abdomen by a sharp object, a pneumatic nail to the chest cavity, a car accident en route to a project, etc.

When it comes to a real emergency, is your team prepared or instructed to do more than dial 911 and stand back? What transpires between the time you dial emergency services and their arrival can make the difference between life and death for your coworkers or yourself.

For example, suppressing traumatic hemorrhage (bleeding) before the arrival of emergency services can increase the survivability of the injured by up to 90%. When an accident happens, your actions can make the difference between a brief hospital stay and a funeral. With a little training, the right equipment and the right attitude, self-aid and/or buddy aid can be administered effectively by almost anyone.

**About the Presenter:** Mike Simpson has 10+ years of experience providing tactical training and IED recognition and response training for military, law enforcement and security personnel. He has worked with over 200 different organizations in 17 different countries.

ARES offers clients a full range of elite security solutions. Our expertise encompasses security consulting, training, and specialized services for high-risk assignments at home or abroad. We work with private and public agencies, large and small, as well as high-profile individuals. Our policy is to understand every facet of your business, your staff, and your mission. Based on this knowledge, we customize a 360° security solution for your organization.

# IAQA Phoenix, AZ Chapter Workshop

## ACR, The NADCA Standard for Assessment, Cleaning and Restoration of HVAC Systems

Presenter: Kevin Uilkie, ASCS, K.M. Facility Services, LLC

NADCA: The HVAC Inspection, Maintenance and Restoration Association, otherwise known as the National Air Duct Cleaners Association, is comprised of a diverse group of HVAC industry professionals, including air systems cleaning specialists, mold remediaters, and HVAC inspectors. The association published ACR, The NADCA Standard for Assessment, Cleaning, and Restoration of HVAC Systems. This performance standard provides minimum procedural requirements based on reliable principles, review of applicable industry literature and information, and practical experience.

The 2013 standard differs from previous versions. The newly revised ACR brings a condensed procedural document that can be easily referenced during the restoration project. The text has been formatted in a clear and concise manner and has been realigned to follow the flow of an actual HVAC assessment, cleaning and restoration job. This provides the opportunity to locate the information you are looking for quickly and easily.

The Standard provides you practical, reliable and industry-backed information for

- Assessing new and existing HVAC systems
- Evaluating and verifying the cleanliness of HVAC system components
- Preventing job related hazards
- Guiding the cleaning and restoration of HVAC systems to a specific level of cleanliness.

Everything you need to know as a HVAC cleaning and restoration professional, is covered including:

- Inspections
- Work Plans
- Engineering Controls
- Cleaning and Restoration Procedures
- Cleanliness Verification and Documentation

This presentation will also offer practical and effective ways that you can use ACR to market your business and increase your earnings. Specific and real-life examples that you can take home and apply immediately.

**About the Presenter:** Kevin Uilkie has been involved in cleaning HVAC systems for the past 22 years. He received his ASCS certification in 2000 and in 2001 started K.M. Facility Services, LLC. He is a Board Member of the National Air Duct Cleaners Association and the co-chair of NADCA's Membership Committee.

K.M. Facility Services, LLC is a family-owned service business that provides cleaning and maintenance services to commercial customers in the greater Phoenix, AZ area.

The company specializes in returning internal, external and infrastructure components, such as HVAC and environmental systems, to their original condition to meet the manufacturer's specifications for performance. This service helps ensure that customers' facilities operate safely, efficiently and cost-effectively, with minimal energy use.

K.M. Facility Services' slogan, "Stay green, save energy," highlights the focus of their business. Commercial customers include health care facilities, manufacturing and industrial properties, high-rise office buildings and other large edifices. K.M. Facility Services holds cleaning and maintenance contracts with a number of government entities within the Phoenix area.

# IAQA Phoenix, AZ Chapter Workshop

## EVENT SCHEDULE

**8:00 am to 8:30 am** - Mix & Mingle over a light breakfast

**8:30 am to 8:45 am** - Attendee Self Introductions, and Chapter Director Comments & Power Point Presentation by Derrick Denis

**8:45 am to 10:45 am** - Presentation #1

**10:45 am to 11:00 am** - Regroup (Biological & Networking Break)

**11:00 am to Noon** - Presentation #2

**12:00 pm to 1:00 pm** - Gourmet Buffet Lunch

## CONTINUING EDUCATION

Many certifying bodies require certificants to prove they are attending industry educational opportunities. For your benefit, the Phoenix Chapter provides you with a certificate of completion and a receipt. Beyond this, the Phoenix IAQA Chapter can apply for continuing education credits (CEUs) for use towards keeping a variety of your certifications current. For example, attending the Phoenix IAQA Chapter workshops will provide you with four (4) re-certification credits (RCs) applicable toward renewing any American Council for Accredited Certification (ACAC) certification.

## CANCELLATION POLICY

Unless you give 48-hour notice of cancellation, when you RSVP you are committing to payment regardless of your attendance, since the Chapter is charged for the space and for each prepared meal. Also, the cost per additional head is higher for walk-in attendees due to the premium fee the Chapter is charged, when we exceed our reserved attendance number.

## UPCOMING WORKSHOPS

- **Tuesday, August 12, 2014**
  - Back to Basics, Everything You Need to Know About Encapsulants and Mobile Mini-Enclosures
  - Wildfires from the Perspective of a Remediation Contractor
- **Tuesday, November 18, 2014**
  - Legally Defensible Combustion Byproducts Analysis Associated with Wildfire Investigations
  - Water Activity: What is it, and Why Should You Care
