The School Performance Framework (SPF) essentially captures the ratio between growth and status (or percentage of students at proficiency) of schools. The Colorado Department of Education and Denver Public Schools calculate the SPF slightly differently, both factor in academic achievement, academic longitudinal growth, academic gaps and postsecondary and workforce readiness. However, DPS also weighs enrollment, student engagement, and parent satisfaction in their calculations. Colorado School Grades uses the State's calculation of SPF rating rather than the Denver Public Schools' calculation. You can read more about the scores and grades of the schools in your district at <http://spf.dpsk12.org/> & <https://www.coloradoschoolgrades.com/>.
