Joy Haulers

Riverside toy hauler options include the electric rear bed, front ladder, and aluminum rims. Standard features include those listed on the back of the brochure, plus, steel wheel wells, "beaver tail" rear entry which serves to extend the spring assisted ramp door with a steel receiving hoop, and a front mount generator tray so you can add your own generator of the size and specifications you want. And when you aren't using the camper you have a portable generator for home use.

Standard sofas fold up against the wall to increase storage space and also fold out to make a large sleeping area. The flooring is made from Performax structure wood which is moisture resistant, and the roof is decked with 3/8" wood covered topped with one piece rubber providing a walk on roof.

Why Metal Sides

Why are Metal Sided Trailers Better?

A simple search of "RV delamination" in any internet search engine will return a list of significant and expensive damage done to campers with fiberglass walls by the intrusion of water to the side-wall causing plywood and adhesives to let go resulting in blistering of the skin. This is referred to as delamination. There are no easy repairs to this type of problem and the resulting depreciation to the value of the camper can cause lasting financial issues.

Traditionally manufactured trailers offer manageable solutions to this issue. Here are some other benefits to traditional manufacturing:

- * Wood framing offers insulation, hollow aluminum does not.
- * Metal siding is painted much like an automobile and does not fade. Fiberglass fades with age.
- * Metal can be purchased in multiple colors improving the exterior looks. Fiberglass panels are only one color and stickers or paint added for color.
- * Metal has "ridges" which provide lateral lines that improve the look of the trailer. Fiberglass is smooth often showing panel seams.
- * Metal allows for blocking to be added to the wall for aftermarket accessories should you wish to add items at a later date. Fiberglass walls cannot be altered.

* Wood frame, metal sided units allow for flex. Fiberglass units under stress can crack.

RIVERSIDE

Outside kitchen with refrigerator, double bowl sink, gas grill, at a convenient height.

Master suites include pillow top mattress, reading lights, four doors above bed, and plenty of outlets.

Upgrade window treatment features wood trim, pleated shades and LED lighting.

Oversized windows bring in the outdoors and eliminate the "closed in" feeling when the you stay in.

Plenty of space for larger wall mounted TV's, plus one side offers 30" entry to front bedroom.

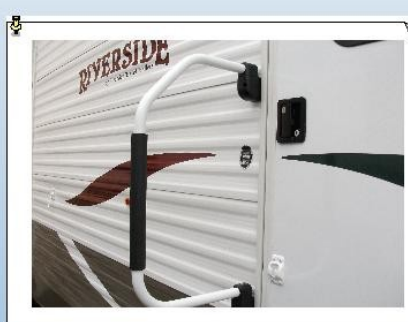

Standard outside shower offers hot and cold water access for washing off sand or filling the dog's water.

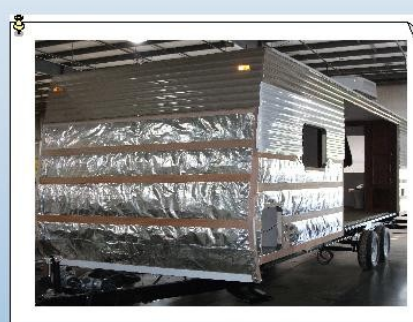

Two storage doors on larger slide rooms, one for access to under the sofa and one for under the dinette.

LED lighting reduces 12vt power requirements and increase the time between bulb changes!

Oversized entry access handle that folds flat against the trailer for towing.

Optional Radiant Technology insulation wrap available for use in extreme conditions.

Floor covering offers superior protection against cold cracking and moisture.

"U" shaped dinettes include two interior and one exterior storage areas.

Colored front metal coordinates with lower and upper bands setting the tone for the stylish graphics

Slide out end windows open for cross ventilation. Not just for looking out!

Large galleys lots of storage, wood doors, LED lighting, and a real backsplash!

Upstairs loft offers plenty of sleeping space, a TV hook up, windows, AC ducts, and a roof vent with fan.

Standard oven and three burner cook top. All ready for "pizza night".

A dedicated outlet for awning lights is powered by an interior switch for convenience.
