Glenmont Forest Green Streets Project

Join the Montgomery County Department of Environmental Protection (DEP) to learn about proposed Green Street practices such as bioswales and rain gardens in your neighborhood.

These small-scale stormwater practices will be located within street Right-of-Way areas and will capture and filter runoff from the roadway, helping to restore water quality and improve the health of Rock Creek.

Attend this meeting to view and comment on proposed Green Street opportunities and locations.

March 12, 2014

Sign-In: 7:00 - 7:30 pm

30 Min. Presentation: 7:30 - 8:00 pm
