

**Richard Stuebi** has 25 years of experience in the energy and cleantech sectors in various capacities as an investor, entrepreneur, executive and consultant. Richard is President and Chief Executive Officer of MAR Systems, a VC-backed early-stage growth company based in suburban Cleveland. MAR Systems sells its proprietary Sorbster media to clients that require highly toxic contaminants such as mercury and selenium to be removed from water. Previously, Richard was a Managing Director of Early Stage Partners, a Cleveland-based venture capital firm, where he led ESP's cleantech investment activities. In addition, Richard continues to support various civic initiatives in Ohio resulting from his 2006-2010 tenure as Fellow for Energy and Environmental Advancement at The Cleveland Foundation, during which time he also was a founding Principal of NorTech Energy Enterprise. Richard has been a pioneer in the cleantech arena since its earliest days, having founded NextWave Energy in 1999, a professional firm to assist clients in commercializing new technologies and building platforms for successful growth in the energy sector. Reflecting NextWave Energy's entrepreneurial interests, he co-founded two ventures and served in interim management roles at several other emerging cleantech companies. Earlier in his career, Richard was a Senior Vice President of business development at Louis Dreyfus Energy in Connecticut. Previously, he was a management consultant in the energy practice at McKinsey & Co in Atlanta and San Francisco, and an economic consultant in the energy practice of ICF Resources in Washington DC. From this accumulation of experience, Richard is well-versed in many aspects of the energy and environmental sectors, spanning economics, regulations and market dynamics. He has established relationships throughout most segments of the energy and environmental industries, including electric utilities, oil/gas companies, equipment manufacturers, project developers, banking institutions, venture capital firms, professional advisors, government agencies, and researchers. Richard is a frequent speaker and has published numerous articles on energy and environmental topics, including weekly contributions to CleanTechBlog. He regularly attends national conferences pertaining to advanced energy and clean technologies. Richard serves on the Board of MAR Systems of Solon Ohio, and EnLink Geoenergy Services of Los Angeles. He is also an advisor to two private equity groups with cleantech interests, Los Angeles-based Craton Equity Partners and Singapore-based Novo Tellus Capital Partners. Richard earned degrees in Economics from the Massachusetts Institute of Technology (1984) and Stanford University (1986).
