

The Consulting Club

The Consulting Club at Virginia Tech is bridging the gap between Virginia Tech students and business consulting firms from around the world. As an industry-oriented club, we help the student body at Virginia Tech learn more about a career in consulting. Members work with businesses around the Blacksburg area in developing business and strategy solutions while advancing their knowledge and honing our skills on real consulting issues. In preparation for projects, analysts participate in workshops and other opportunities that will allow us to succeed as competitive candidates for entry-level consulting jobs.

We are open to all majors and here are our dates for recruitment:
