

Greeting,

I work for a local start-up, called CampusZebra. We are looking for three students to help with social media marketing, email marketing, and other marketing strategy.

It's a PAID PART-TIME job. The time is extremely flexible. We prefer students who have already had experience with social media marketing and email marketing. Knowing how to use Google analytics to track social media is a big plus. We are hoping to work with students who are creative and passionate about online marketing.

Please email your resume to job@campuszebra.com
