

Sexual Changes after ABI

Families4Families Inc.

Acquired Brain Injury Support Network

10.00 am - 12 noon Tuesday 2nd December 2014
@ Sellicks Community Hall, William Eatts Reserve,
Riviera Road, Sellicks Beach.

After ABI, our lives can change in many and varied ways. For most people their sexuality is a private side of their life that they do not normally discuss with others. **Yes this means we don't address challenges that maybe present and people can feel** alone and unsupported if we remain silent. In this topic we bravely discuss issues around sexuality and sex after injury and how this is one of the areas in which our lives can be different after ABI. The topic will explore the benefits of sex, disability and sex, physical challenges for sex post injury and options for sex after ABI. For some people this may involve seeking the support of a professional- be that a sex therapist for assistance with aspects such as positioning and techniques to those who wish to seek help from a disability trained sex worker. Jen recently attended a forum on disability and sex workers and she will share some of that **information with the group. Let's be brave and discuss these issues with the view** of helping those with ABI and their families, that want to, to reap the benefits that can be derived from healthy sex life after ABI

Hear about our Network, enjoy meeting other people with ABI and their families, and (of course) sharing morning tea!
