

MAY

We are already reaching some of the goals we set for this year. We wanted to make good use of our office space at Clinica Ezell on the Friday's when clinic is held there. We are doing this and have many families and patients who attend these Friday clinics and are hearing the Word.

There are patients who have come to study the Word who are interested in knowing about Jesus Christ. They also want to understand the meaning of evangelism and the structure of the church. Our first group we studied with was eighty people who all received a Bible. We

shared some agreeable moments with them and gained their trust enough that they now feel comfortable sharing about their life experiences with us.

Another goal we set was to help support the congregations by teaching the brothers and sisters how to better sing praises together.

There have also been congregations with problems so we have worked with their leadership to help them find solutions through scripture for the issues that they are dealing with.

At the clinic in Samayac we came in touch with some patients who were from Mazatenango from a neighborhood called El Compromiso. This family is now receiving Bible study and we trust in God that by this means they will grow spiritually.

JUNE

Another of our goals for this year was to help with the planting of new churches. This month in Rio Bravo, the Lord gave us the opportunity to meet people from a new settlement called La Fortaleza. This neighborhood is located near El Guayabal of Santa Barbara, Suchitepequez. That is where God allowed us to visit and find that there were several brothers and sisters in the area who had stopped attending church for lack of a place to attend near by. These

brothers and sisters have reconciled to God and on June 8th a couple, Marcelino and Veronica Gonzalez were baptized. Their church now has eight active members to the glory of God.

The blessing of God in this new town motivates us to visit with more frequency as there are many other people who are opening their doors to Bible study.

Yet another of our goals was to better strengthen the leaders of the congregations and to have stronger song leaders. Thanks to God we have advanced in this effort with interest among the congregations and an always growing number of people to hear the Message.

Beloved brothers, may God bless you richly.
