School Alert System Increases Overall School Safety/Security Score at Rainier School District

November 2013 – RAINIER WA

Rainier School District is the proud owner of the highest initial *Excellence in Safe School Operations (E.S.S.O.) Certification* score ever recorded for any school public or private, and the School Alert System helped them achieve this impressive first score.

This past summer Rainier School District became the first school district anywhere to install the School Alert Emergency Response System, and their decision to do so continues to pay dividends…

The Excellence in Safe School Operations Certification is an objective, third party measurement of a school or school districts day-to-day operations within the framework of the 26 Safe School Standards.

The district chose to hire NewDawn Security to not only measure its current safety/security operation in relation to the 26 Safe School Standards, but also to provide assistance in improving current standard levels, supplying additional services, and adding continual support throughout the school year.

“The implementation of the School Alert System immediately helped raise the score of the Emergency Operations Plan’s Safe School Standard at the Rainier School District, and although E.O. Plans are just one of the 26 Safe School Standards, you could tell that the passion and pride Rainier School District Staff had with being the first to install School Alert carried over into all aspects of school safety”, said Sean Spellecy, C.E.O. of NewDawn Security. Spellecy also added, “School Alert is hands down the most effective emergency response enhancement system on the market, however, if you don’t have strong leadership at the district level, and capable staff who feel personally responsible for their students well being, there is no way their ESSO Certification scores would be so high.
