

Summer Access to Online Site licenses

Hello Lafayette families and members of the community! This summer your children have access to multiple online sites that can help them stay fresh for the next school year. As always, please contact nathan.wieand@dc.gov if you have any questions about the programs. Please know that there may be some gaps in the time in which I am able to respond, which is why I have included some other outlets for support. To access the sites please use the Lafayette Technology Website at:

<https://sites.google.com/site/lafayettetechnologyresources/home>

Have a great summer everyone!

ST Math – Students in grades 1-5 will be able to access their ST Math accounts throughout the summer months. They can replay lessons for practice, catch up on objectives they were not able to complete during the year, or finish any of the optional or challenge activities. We will continue using the ST Math program next year with the addition of our kindergarten classes. Please note that students will not be able to access content from their succeeding grade levels. For additional support with ST Math please call Tech Support: 888-491-6603

i-Ready – students in grades K-5 may also continue using the online reading program, i-Ready. They can continue completing lessons and use their earned tokens to play games as rewards. The program will deliver new content to students until we assess them in the fall under their new grade levels. For additional support you may call 800-225-028 ext. 6, access the chat feature by clicking Support at www.i-ready.com or email: i-readysupport@cainc.com

Google Apps for Education – students in grades 1-5 will continue to have access to their Google Apps for Education accounts. This includes their Google Drives as well as many other apps that fall under Google's expanding collection. Some teachers of younger grades chose not to distribute individual account information to students, but I am more than happy to provide this information to anyone who is interested.

Sumdog - Students in grades K-5 may also play Sumdog, which mostly offers access to arithmetic and math facts, but also provides practice with money, measurement, and graphs among many other skills.
