

QuickBooks is Great for Year End Tax Planning, but ...

Are you getting the most from your QuickBooks software?

QuickBooks is a terrific software package for reconciling end of year statements and tax planning. But a software package doesn't fully know the ins and outs of your unique business.

Sometimes it's helpful to sit down with someone who understands your frustration when problems arise. We can help you maximize QuickBooks software for very specific operations, such as:

- year end reviews for subcontractor payments
- preparing 1099's
- reconciling all bank and credit card accounts
- reviewing all equipment purchases and equipment depreciation

Call or email us if you would like help making the most of your QuickBooks software for year end tax planning.
