

Sterling Bearing ca. 1945

**The Company...** Our long tradition relating to engines started in 1936 when Sterling "Bearing" began operations reconditioning babbitt connecting rods. As times and technology changed the company shifted production to crankshaft remanufacturing. In the early '70's Sterling began distributing parts and in 1975 introduced one of the first engine kits in the USA, BLOCKMASTER.

Sterling continued to operate a full-service machine shop and production crankshaft plant until 1994 when the company shifted all its resources to distributing engine parts and remanufactured engine components. In July of 1999 we opened a branch warehouse, Sterling Engine Parts, in Minneapolis, MN. In May 2009 we acquired a well-known engine parts specialist warehouse in Worcester, MA, New England Engine and Parts Warehouse. In September 2014 we opened a branch warehouse in Dania Beach, FL.

**Our People...** Our 30 employees have over 600 years of combined experience in the automotive industry. Our non-commissioned sales people are focused on providing our customers "sterling" service. We operated a machine shop for many years so we know how to provide engine builders with the right parts and service.

**Our Inventory...** Sterling manages 500,000+ part numbers from over 100 prime manufacturers. Parts are either on the shelf or we'll get them for you. Let us source the parts while you focus on engine building. We specialize in engine parts for domestic, import, heavy duty, agricultural, industrial and marine.

**Customer Support...** We've got lots of ideas to help you profit by selling parts. Our 78-page Engine Parts Book is designed to help you sell parts. This unpriced booklet features top brands and is supplied to your shop free of charge.

**Technical Help...** You've come to the right place. We have a lot of experience, not only looking up engine parts but building all kinds of engines. And if we don't know an answer, we'll find it.

### Same Day Shipping...

There's no cut-off time at Sterling. If we have it in stock we'll ship your order the day it is received.

And, if we don't have it in stock, we will find it and ship it per your instructions.

**Easy Ordering...** our "ENGINE PRO's" are standing by to take your order or help you design a kit to fit your needs.
