

# The Yale Center for Dyslexia & Creativity

## San Francisco, California Resources for the Evaluation and Treatment of Dyslexia

This list has been generated by recommendations from people who are knowledgeable about dyslexia and the diagnostic process. The Yale Center for Dyslexia & Creativity doesn't personally know those individuals or clinics listed, but wanted to provide you with a helpful resource in the diagnostic process. Cost varies considerably, depending on the age of the child and the testing required. Please inquire when contacting the provider.

Of course, prior to scheduling an evaluation, we recommend asking the professional these key questions:

*Do you focus on dyslexia in the diagnostic process?*

*Do you make a diagnosis of dyslexia (using the word dyslexia)?*

*Do you indicate dyslexia as a primary diagnosis?*

*Do you provide evidence-based treatment recommendations linked to the diagnosis of dyslexia?*
