

## Huff and Puff House

### A Maker Faire Challenge!

Is your student rummaging through your garage looking for materials to build a house? On our final T3 day, the primary teachers challenged their students to design and construct a house with a roof (5" tall X 3" deep X 3" wide) that will withstand the force of the "Big Bad Hair Dryer"! We are looking forward to seeing what our little architects come up with! If you need clarification or more information on the procedures and directions for this project please contact Frieda Parker:
