★ I will teach you the right way to find products to sell online...
And it's not what you think -- not even close!!

To really understand the problem with drop shipping, you need to understand its origin.

Before the internet, companies that had products to sell but didn't have retail (brick-and-mortar) stores would sell their products through catalogs and door-to-door sales. So, they needed a sales force to go out and actively find buyers. These types of sales teams are often referred to as "feet-on-the-street". Literally people to walk around and sell products.
