

RRTC – EBP VR

Rehabilitation Research & Training Center for
Evidence Based Practice in Vocational
Rehabilitation

October 2014

What is the Rehabilitation Research and Training Center on Evidence-Based Practice in Vocational Rehabilitation (RRTC-EBP-VR)?

We develop evidence-based knowledge and tools for VR practitioners that will improve employment rates, and quality of employment, for people with disabilities.

Vocational Rehabilitation Counselors' Use of Evidenced-Based Practices Involving Motivational Interviewing

Tim Tansey, a member of the RRTC-EBP VR research team, presented on VR counselors' use of EBP involving motivational interviewing along with an RSA-funded TACE center professional, a VR agency supervisor, and a VR counselor. View the webinar via [YouTube](#) to learn:

- What is motivational interviewing (MI) and its evidence base?
- How has MI been used in vocational rehabilitation (VR)?
- What evidence demonstrates the effectiveness of MI in VR service delivery?
- What is the role of practice guidelines in the use of MI in VR service delivery?

This webcast was hosted by the Center on Knowledge Translation for Disability and Rehabilitation Research.

Targeted Interventions to Increase Community Participation and Life Satisfaction in Consumers

Targeted interventions that focus on strengthening the positive human traits of cause and effect, perceived control, resilience, and hope could significantly impact the level of community participation and sense of well-being in people with disabilities. Read more about these interventions [here](#).

Evidence-based Best Practices in the Public Vocational Rehabilitation Program that Lead to Employment Outcomes

Findings from the RRTC's Phase II study are featured in a Special Issue of the Journal of Vocational Rehabilitation. You can access the Journal at no cost at [IOS Press](#).
