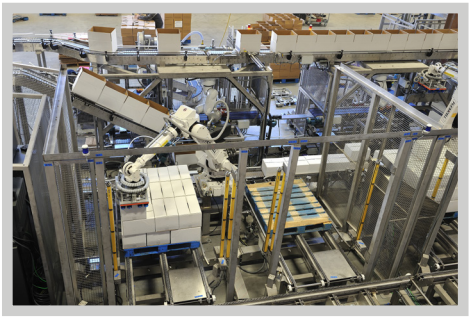
FLEXICELL

Robotic Palletizing Solutions

Efficient • Reliable • Flexible

Palletizing Systems



Features

- Flexibility for pallet pattern varieties; Low level or high level infeed capability
- The best technology; Highly-customizable servo-powered robots
- Accurate sorting of single infeed with multiple barcodes
- User-friendly interfaces and controls with multiple-level operator and maintenance screens
- Low cost of ownership; very low maintenance requirements
- Stainless steel or other special environment specifications available

Benefits

- Efficient, reliable, and accurate
- Flexible; easily reconfigured at a later date to meet changing requirements
- Safer; minimize heavy lifting and repetitive motion problems
- Save money; Guaranteed return on investment
- Continuous operation; maximum uptime and throughput everyday
- Integrate with carton loading & case packing for a full end-of-line solution

Material handling is incorporated into each palletizing system. Examples include conveyors or Automatic Guided Vehicles for pallet transfer, tier/slip sheets, automated stretch wrapping, and pallet dispensers.
