

**Full-Time Clinical Position  
Director of Nephropathology  
Washington University School of Medicine**

The Department of Pathology at Washington University School of Medicine is seeking a full-time nephropathologist. The candidate must be board certified by the American Board of Pathology and have formal subspecialty training in nephropathology. The candidate must also have an interest in teaching medical students, residents, and fellows.

The candidate will work as Director of the Nephropathology Section of the Division of Anatomic and Molecular Pathology. The Department has recently made substantial investments in the core histology/immunohistochemistry and electron microscopy labs that support the nephropathology service. In addition, the Department has made a significant investment in genomic testing to support the nephropathology service via development of renal disease-specific genetic panels at Genomics and Pathology Services (GPS@WUSTL).

The candidate will be responsible for the outreach necessary for substantial practice expansion of the nephropathology service, and for development of professional education activities that provide CME to area nephrologists and pathologists. The candidate will work with the Directors of the histology/immunohistochemistry lab, EM lab, and GPS@WUSTL to establish quality metrics and turn-around-time requirements for the nephropathology service. Medical writing, clinical investigation, and medical student and resident lectures are academic pursuits that will be encouraged.

Salary and academic rank will be commensurate with experience and qualifications.

For consideration, please forward a copy of your C.V. and three references to:
