Employment Type: Long Term Contract
Location: South Bay Area
Contact: Casey Calcagnie
Casey.Calcagnie@ITCcorp.com

We have multiple long term contract opportunities for Software Engineers *passionate* about designing and programming **Web** based applications with a well-established, cutting-edge and innovative company paving the way for science on a global scale. We aren't just looking for programmers with the abilities to execute requirements, but those who have the aptitude and desire to *innovate* as well. Are you the up and comer we are looking for?

These positions will be creating and supporting internal applications that support all the major functions of the business including, but not limited to: engineering, production, and manufacturing.

Candidates MUST be passionate about programming and technology with:
- Strong coding skills in one or more language (C#, Java, PHP, Ruby, C++, Obj-C, etc.)
- Prior experience with the Microsoft web stack -- C#, ASP.Net, SQL and Windows Server **or** a strong willingness to learn
- Experience with HTML5, CSS3, AJAX/JavaScript
- Excellent problem solving skills
- Ability to get things done in a fast-paced startup-like culture with constant changing priorities
- Strong team skills
- A dedication for learning new technologies and continued growth

Education & Experience:
- Bachelor's Degree in Computer Science or raw knowledge sharpened over years of self-pursuit
- A minimum of 2 years experience programming **web based applications**

Compliance Requirement:
Client is unable to work with any third parties or candidates in need of sponsorship at this time.
