

The Center for Palliative Care

The C.P.C. is a fully recognized Washington non-profit organization. Since we opened in 2011, the C.P.C. has worked to ensure that members of our community have a safe and legal means to alleviate or attenuate their symptoms and/or suffering related to certain ailments and illnesses. The Center for Palliative Care was founded by Ben Reagan and Jeremy Kaufman as a means to assist those in our community who seek alternative medicines, conjunctive therapies, and doctor-recommended cannabinoid treatments.
