Includes Dinner and Training

RSVP BY FRIDAY, AUGUST 8th

As these vehicles become more abundant in the independent aftermarket, the servicing of today's modern hybrid / electric vehicles can add to your shop's productivity. Proper maintenance results in increased profits and higher customer satisfaction. In most cases, these increased shop profits can be gained without the need of special tooling or equipment.

This class is full of information that can help the auto repair technician, the shop's service manager and shop owner to better understand the special needs of the hybrid vehicle, and how to safely address these service opportunities. This presentation covers a multitude of maintenance requirements for hybrid vehicle service. Don't miss this opportunity to see more green by increasing your profits!
