Many older adults live in the same community most of their lives, but as they age, are unable to get "out and about" like they used to; and, so have lost "connectedness" that is so vital to healthy aging. This program offers an opportunity to connect and/or re-connect them with each other.

This interactive Suicide Awareness and Prevention session provides an overview of the three levels of suicide training that will be offered, at no cost, in the DeKalb District in 2015. Jeff and Cheryl provide exceptional perspectives to this training as each one lost a son through suicide.

Raising at least \$1 million dollars means that every church needs to make a significant contribution.

- Malaria, a disease spread by mosquitoes:
3.3 Billion people are at risk of infection
- Kills 655,000 of those infected
- Is a leading killer of children in Africa

Malaria is preventable. When 80% of homes in a village have a bed net, rates of infection drop for the entire community.

Malaria is treatable. Effective means to diagnose and treat malaria already exist.

Malaria is beatable. With our partners, The United Methodist Church aims to eliminate deaths from malaria by 2015.
