

Position Title: **UCLA Center for World Health
Mozambique Partnership Director
Assistant Professor of Pediatrics**

Qualifications: **Board eligible or Board certified pediatrician
Language skills – Portuguese preferred, Spanish okay
2-year commitment preferred**

Overview:

The Center for World Health at the David Geffen School of Medicine at UCLA is seeking an excellent candidate for the position of Mozambique Partnership Director, which is a full time pediatric clinician-educator position at the Eduardo Mondlane University (UEM) School of Medicine and the Central Hospital of Maputo (HCM) in Mozambique. Main duties include oversight of the academic partnership between UCLA and both HCM and UEM, clinical service alongside Mozambican colleagues on a general pediatric ward, teaching and mentorship of both Mozambican and US medical students and residents, and measurement of outcomes associated with partnership programs. Will also be responsible for budget management and reporting, as well as liaising with project partners including CDC Mozambique, John Hopkins University (JHPIEGO), Anadarko, Mending Kids International, Direct Relief International, and private donors.

Job Responsibilities:

Clinical Service (40%)

- To contribute actively to the on-site clinical activities in the Department of Pediatrics at Central Hospital by working alongside local staff, under the direction of the Chief of Pediatrics.

Program Administration (30%)

- To serve as a liaison between the UCLA Center for World Health and *Partners for Pediatric Progress* and all partners including: Eduardo Mondlane University School of Medicine, the Departments of Pediatrics and Surgery at Central Hospital of Maputo, CDC-Mozambique, JHPIEGO, Anadarko, Direct Relief, and Mending Kids International.
- To facilitate and support the existing training activities established by the above parties, to build local capacity, with an emphasis on the sustainability of interventions.
- To complete required Quarterly Progress Reports and annual work plans.
- To manage and oversee the activities that will be completed under the annual work plan, including planning training activities, procuring equipment and supplies, and coordinating meetings with local partners.

- To coordinate and contribute to training activities for US health care providers participating in training activities in Mozambique, and health care providers from Mozambique who will be traveling to the US for additional training.
- To oversee all in-country program-related activities.

Educational Activities (20%)

- To teach Mozambican medical students and residents together with Mozambican faculty.
- To coordinate US medical student and resident training activities in Mozambique, and to oversee and directly supervise these activities in-country.
- To pursue scholarly interests, which may include creating new curricula for US based or local trainees, tracking outcomes associated with educational interventions, or publishing information about ongoing training activities.

Monitoring and Evaluation (5%)

- To conduct ongoing evaluations of existing program activities, and identify ways to improve these.
- To conduct ongoing needs assessments within the hospital and its training programs to identify high priority projects.
- To work towards monitoring patient and/or educational outcomes associated with project interventions.

Fundraising/Financial Efforts (5%)

- To contribute to fund raising efforts and to explore potential new revenue streams to support the program.
- To monitor program-related expenses, and contribute to annual budget planning and identification of priorities for existing and new sources funding.
