

## **Keith McAuliffe**

### **Professional Profile**

Keith McAuliffe is a Distinguished Engineer and Global Client Director in IBM's Global Financial Services Sector. Mr. McAuliffe currently serves as IBM's Global Client Director responsible for JPMorgan. Mr. McAuliffe was IBM's Client Technical Advisor (CTA) for JPMorgan Chase from 2010 through 2013 and the CTA for Morgan Stanley from 2006 through 2010. As the CTA, Mr. McAuliffe led all of IBM's architectural and technology strategy worldwide for his clients. This includes defining their analytics strategy, digital platform, core retail banking platform renovation, firmwide high performance compute strategy, and application development processes.

Mr. McAuliffe was appointed an IBM Distinguished Engineer in 2003. Mr. McAuliffe held several leadership responsibilities in IBM's Global Business Services (GBS) organization. During the course of his career Mr. McAuliffe developed a breadth of experience and a proven track record of delivering successful consulting engagements.

While in GBS, Mr. McAuliffe was the Chief Architect for Medicare's HIGLAS program, which deployed one of the largest Enterprise Resource Planning (ERP) solutions in the world. HIGLAS provides Medicare with their first integrated general ledger system, which processes medical claims disbursements accounting for greater than 7% of the United States GDP.

Mr. McAuliffe started his career with AT&T and received a Bachelor of Science in Computer Science from St. Peter's University. Mr. McAuliffe is married with 2 children and lives in New Jersey.
