

CAMPUS SAFETY SERVICES

Our students' safety is always a priority at USF. With the presence of a dedicated police department and ready access to mobile information and services, USF's Tampa campus has low incidences of crime. Help us to make sure your student is fully aware of and using the following services to help ensure their personal safety.

When your student first arrived at USF, they were either required or encouraged (depending on the year they arrived) to register for [MoBull Messenger](#). MoBull is part of our emergency notification system and alerts our community via mobile phone text in the event of a campus emergency. Although parents cannot subscribe to the MoBull service, we encourage you to check with your student to make sure they are still subscribed to this important service. It is our most rapid means of communicating and is reserved for emergencies.

USF also offers other voluntary mobile applications/ services to help ensure our students' safety. *Guardian* turns your student's phone into a mobile timer as they travel from one location to another on campus. If they do not call to cancel the timer, University Police are alerted to investigate. *Smart 911* provides emergency responders with critical personal data about your student if they call 911— like a photo, class schedule, and vehicle info — to facilitate their response. More info about these services is available at <http://www.mobull.usf.edu/>.

Additionally, [Student Government's SAFE Team](#) offers safe and free golf cart rides or walking escort across campus from 6:30 pm to 2:30 am.

In the Event of an Emergency

*In the event of a campus
emergency, parents and
family members should
visit the university's
website at www.usf.edu
for campus updates.*

*Please encourage your
student to do the same
to supplement any
MoBull text they receive.*
