

# CENTERFLOW™ BASE & LID

## For smaller batch sizes

The reusable CenterFlow Container from Buckhorn is the most efficient, versatile container available to transport and dispense seed, granular/pelletized material and small manufactured components. Buckhorn has expanded this line by making a new base and lid for smaller applications like mixing/blending, work in process, research and development and other specialty processes. Similar to the original 57" x 45" x 65" box, the new base holds up to 2,500 lbs. and stacks four high.

CF57453200

- Handles loads up to 2,500 lbs.
- Smooth, funnel-shaped interior has a 35° angle for efficient flow of contents and complete emptying in as quickly as 30 seconds
- Side access door allows one person to control the flow and safely remove all or part of the contents
- Structural foam molded HDPE construction resists impact, moisture and most chemicals
- Will not rust, peel or splinter
- Accompanying structural foam lid replicates that of existing CenterFlow Container
- Tight-fitting lid provides extra protection against contaminants
- Works with most standardized equipment
- Equipped with two document pouches
- Use with temperatures of -20° to 120° F
- Backed by a one-year limited warranty
- 100% recyclable
