

Gabby: When Gabby came to Orphans of the Storm he was 9 years old. I fell in love with her and quickly adopted her.

Gabby was not in good shape. She had no front teeth and missing a lot of back teeth ... her ears were hard as a rock. She developed a mammary lump that was cancerous and was removed. The vet said she got the lump because original owner had obviously used her for breeding.

Gabby was also very submissive ...when I would start to pet her, she would lower her head and vet also said she was probably bopped on the head.

Gabby has a happy home now with lots of love and sleeps in bed. She lives with two other dogs and knows that she is the Queen.
